TECHNICAL PROJECTS

Coffee Bets | Front-end Developer/Software Engineer| [Github](#) | [Coffeebets.com](#)

Coffee Bets is a full stack basketball sports betting application using Java, CSS, Spring Boot, MySQL, Bootstrap, JQUERY, Javascript and HTML.

- Utilized Bootstrap to create a responsive customizable website that was user friendly while keeping out fewer cross browser bugs.
- Implemented a responsive design with CSS for engaging UI components and page layouts.
- Leveraged Javascript to create a responsive website for users to interact with other users while minimizing time required for compilation.

MyWorkoutBuddy | Full-Stack Developer/Software Engineer| [Github](#) | [Myworkoutbuddy.com](#)

MyWorkoutBuddy is a full stack fitness tracker to log workouts done in the day using React, CSS, MongoDB, Mongoose, Bootstrap, Express, Javascript and HTML.

- Worked in REACT to build an interactive user interface quickly and efficiently.
- Implemented a responsive design with CSS for engaging UI components and page layouts.
- Leveraged Javascript to create a responsive website for users to interact with other users while minimizing time required for compilation.
- Express was used to help build my multi-page application. Also used to help manage my server and routes.
- MongoDB was used to store information given into a database for later use

JAGs Tech Spot | Full-Stack Developer/Software Engineer| [Github](#) | [JagTech.com](#)

JAGs Tech Spot is a full stack company site that allows admin and employee roles using React, Redux, CSS, MongoDB, Mongoose, Bootstrap, Express, Javascript and HTML.

- Worked in REACT to build an interactive user interface quickly and efficiently.
- Utilized Redux by creating a store and extracting the data needed
- Implemented a responsive design with CSS for engaging UI components and page layouts.
- Leveraged Javascript to create a responsive website for users to interact with other users while minimizing time required for compilation.
- Express was used to help build my multi-page application. Also used to help manage my server and routes.
- MongoDB was used to store information given into a database for later use

PROFESSIONAL EXPERIENCE

ELK Energy – MVP Project | Document Control/Office Manager | Beckley, WV,

April 2018 – June 2022

- Working with management to ensure all the necessary documentation for 67 miles of 42" natural gas pipeline and interconnect is collected, received and uploaded properly.
- Utilizing and training staff on programs such as GoFormz, Box and Epilogue.
- Responsible for keeping asset records up to date and accurate for audit purposes.
- On-boarding and off-boarding all new hires and those leaving the project. Ensuring protocols set by management for inspectors brought onto the project are followed. Certifications are up to date and Safety/Environmental training are completed.

- Conducting New Hire Training; walking new hires through daily duties and expectations, as well as, teaching the inspectors how to use the required programs for reporting and data collection. Navigation of the many tools available to them digitally to provide all the necessary information while in the field.

T-MOBILE | Retail Sales Manager | Groton,CT

May 2017- April 2018

- *Oversee 10-15 employees on a day-to-day basis for training, weekly meetings, coaching of personal goals and tasks, and completion of shift work*
- *Responsible for withholding personal and confidential information on each customer's account and following strict protocol for access*
- *Work on sales floor to sell and educate customers on the products, plans, and promotions for the company*
- *Supervise reps on sales floor*
- *Daily closing and opening routines- scanning, filing, updating excel spreadsheets, and writing out daily reports*

EDUCATION
